

relax, it's all under control.

IT Controls knows that home is where you go to relax. It's the place where you kick off your shoes, put on some tunes, and leave the hectic world behind. Maybe that means kicking back in the recliner and watching the big game or perhaps that it means unwinding in the hot tub with some mood music.

Whatever your vision of home is, IT Controls is there to make technology work for you. We offer a wide range of elite products and services to make your home a sanctuary—a place designed to maximize your safety and comfort so that you can focus on the things that matter to you.

imagine a place
called home

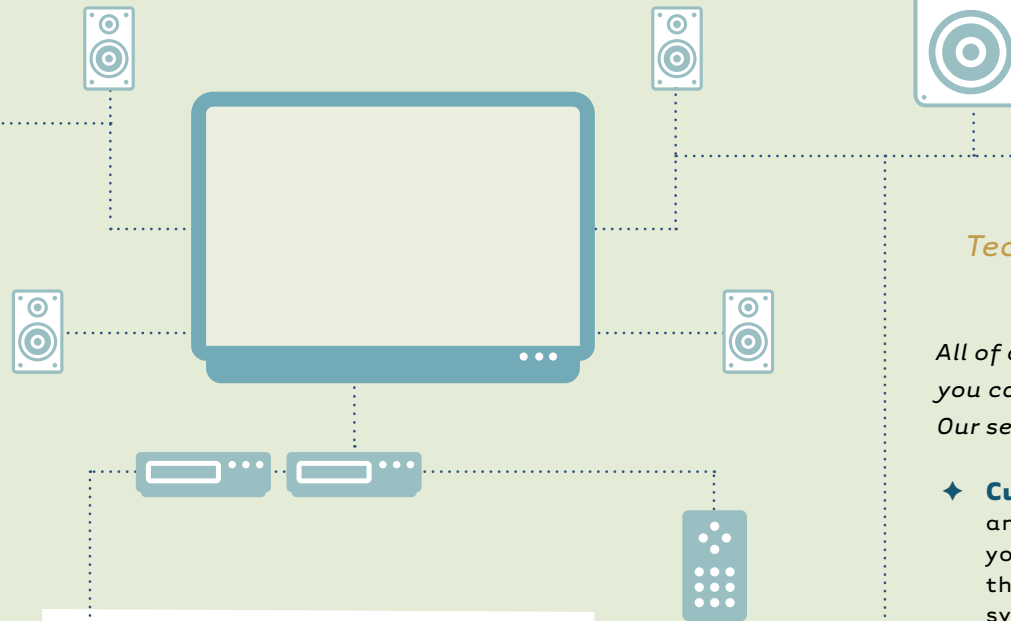

kick back

*Live the good life at home
with the luxuries you deserve*

Whether it's a flat panel above the jacuzzi, tunes by the pool, or the ultimate home theater – IT Controls will make it happen, leaving only the entertainment up to you.

- ◆ **Set the mood.** With lighting and music it's easy to change the look and feel of your home. Whether you're throwing a party or relaxing for a cozy evening at home we can help you create the mood that has the right feel.
- ◆ **Watch a flick.** Sometimes you just need a night at home and with a theater in the basement it won't be hard to convince the rest of the family. You pick the feature and we'll create a room that places you in the center of the action.
- ◆ **Serve it up.** It's never been easier to store and retrieve all of your electronic media. From Beethoven in the bathroom to Spielberg in the den, we can design a system to distribute the music and movies you want to the rooms where you want them.
- ◆ **Spin some tunes.** Jazz in the spa, classical in the kitchen, rock in the home gym. We put your music where you want it and bring the sound to a whole new level. With our systems you'll hear your music the way it was meant to be heard.
- ◆ **Organize it all.** Forget the five remotes on the coffee table and the pile of DVDs on the floor. Our solutions, including custom remotes to in-wall touch screens, allow you easy access to the information you need and the content you want – without the clutter.

breathe easy

Custom security systems bring peace of mind

*There is nothing more important than knowing that
your home is safe and sound.*

- ◆ **Ensure your security.** With a monitored alarm system you'll never be in the dark about your home's security. And when there is an emergency you'll know that help is on the way.
- ◆ **Check your status.** Using the internet or phone, check on the status of your home or cottage remotely, check the temperature, make sure the doors are locked, and relax knowing all is well at home.
- ◆ **Keep a watchful eye.** Using networked cameras, it's easy to check on your home: to see what time the kids got home, whether a package arrived at the front door, or just to make sure your home or cottage is secure.

it's that simple

*Technology that works for you,
straightforward and reliable*

*All of our products come with a premium service package so
you can relax knowing that your system will perform reliably.
Our service includes:*

- ◆ **Customized design.** We'll evaluate what you want and where you want it, designing a system that meets your needs. We ensure that all of our installations use the most current standards to ensure the life of your system.
- ◆ **Reliable installation.** We'll work with your architect, builder and other tradesmen to ensure a flawless installation. We use products that are proven to be reliable, and if there are ever any problems, we'll be there right away.
- ◆ **Simple operation.** We'll make sure your system is easy for you to use. From remotes to in-wall touch screens we can design a system that allows you easy access to the information you need and all the content you want.

**Ready to create the system
of your dreams?**
